

API Documentation:

We have offered a “Read-Only” REST API for the following features:

1. ATM Card details
2. Cash Withdrawal Transactions
3. Cash Transfer Transactions

ATM CARD DETAILS

Usage:

curl -H “Accept: application/json” http://localhost:8000/api/v1/atmcard
or
curl http://localhost:8000/api/v1/atmcard/?format=json

To query the schema, use:

curl <http://localhost:8000/api/v1/atmcard/schema/?format=json>

To set pagination limit, use:

curl http://localhost:8000/api/v1/atmcard/?format=json&limit=10

CASH WITHDRAWAL

Usage:

curl -H “Accept: application/json” http://localhost:8000/api/v1/cashwithdrawal
or
curl http://localhost:8000/api/v1/cashwithdrawal/?format=json

To query the schema, use:

curl http://localhost:8000/api/v1/cashwithdrawal/schema/?format=json

To set pagination limit, use:

curl http://localhost:8000/api/v1/cashwithdrawal/?format=json&limit=10

CASH TRANSFER

Usage:

curl -H “Accept: application/json” http://localhost:8000/api/v1/cashtransfer
or
curl http://localhost:8000/api/v1/cashtransfer/?format=json

To query the schema, use:

curl http://localhost:8000/api/v1/cashtransfer/schema/?format=json

To set pagination limit, use:

curl http://localhost:8000/api/v1/cashtransfer/?format=json&limit=10
